EDUCATION

University of California San Diego
B.S. Computer Science

Major GPA: 3.71

June 2022

PROJECTS

Impulse (Hacktech) <https://devpost.com/software/impulse-kuwe0b> March 2019

- **Won** Most Aesthetic/Well-Designed Hack at Caltech
- Designed a web application which filters internship emails into a visually appealing layout
- Built it in **JavaScript** using **React** framework and interactions with REST API
- Utilized **node.js** with oauth2 flows with Gmail API to grant users permissions
- Identified status of application with 90% accuracy using GCP Natural Language Processing API

BitPic (SB Hacks) January 2019

- Worked on **back-end** on an android mobile app using **Java** in Android Studio using **Android framework**
- Analyzed .jpg photos with Google Cloud Platform Vision API with 80% accuracy
- Built algorithms to parse results and retrieve search terms to use with SnapKit API
- Retrieved relevant Bitmoji stickers based on photo taken and made a feature to share to other applications

Discord Bot (Personal Project) December 2018 – January 2019

- Worked on a feature that let the bot act as a middle man for two people sharing private information
- Created a bot on Discord platform using discord.js library interactions with Discord API
- Used **JavaScript** extensively along with **JSON** to store and retrieve data for users

PROGRAMS ATTENDED

SPIS (Summer Program for Incoming Students) August 2018 – September 2018

- Learned first order Markov chain models to build a functional natural language processing API
- Used **Python's** BeautifulSoup library to scrape information from campus dining halls
- Built a [website](#) that presented data from UCSD Dining Halls in tables generated by the pandas library

College of the Desert's CODE Summer Program June 2017

- Coded in **C** to establish an interactive connection between Arduino and Raspberry Pi
- Used an ultrasonic sensor to detect distance from an object and present to an LED

TECHNICAL SKILLS

- Proficient Programming Languages: **JavaScript, Python, Java**
- Familiar Programming Languages: **C, C++**
- Frameworks: **Android, React**
- API: **Google Cloud APIs, REST, SnapKit, Discord, Gmail**
- Interests: Computer Science Engineering Society (**CSES**), **IEEE**, **WIC**
